

MANAGEMENT OVERVIEW

Regional transit connections

Where the master schedule connects well — and where it needs attention.

Illustrative data onlyNot an analysis of your current master schedule or provider feeds. Times, routes, stop pairings and results are fictional.

COMFORTABLE

7 / 12 trips

5–20 min remaining after walking

TIGHT TRANSFERS

2

0–4 min margin after walking

NEEDS REVIEW

2

Cannot connect or wait is too long

NOT ASSESSED

1

Missing timing or stop-match data

4 connections merit a planner’s review.

7 of 11 assessed trips have a comfortable transfer; 1 more cannot yet be assessed. Prioritize the first morning departure at Barrie South: the sample rider reaches the platform 3 minutes too late.

Priority connections to review

Timing gaps first

1

Barrie South · Train to Union

Route 100 · 6:30 AM · 3 min short of making it

2

Barrie South · Train from Union

Route 100 · 5:24 PM · 32 min after walking

3

Allandale Waterfront · Train to Union

Route 8A · 7:30 AM · 2 min after walking

4

Downtown Terminal · LINX toward regional destination

Route 7 · 9:20 AM · 2 min after walking

What the numbers mean

One regional trip is one connection opportunity. Both directions matter: getting to a train or regional bus, and getting home from it.

Walking time is deducted before judging the transfer. Long waits and impossible transfers are flagged separately in the details.

• Comfortable

• Tight

• Needs review

• Not assessed

Data gap: one Downtown return trip remains unknown, not a failed connection.
